

McGRAW-HILL VIDEO/AUDIO PROFESSIONAL

JERRY WHITAKER  
SERIES ADVISOR

# Digital Television Fundamentals

**DESIGN AND INSTALLATION OF  
VIDEO AND AUDIO SYSTEMS**

**SECOND EDITION**

- Explains all relevant SMPTE and CCIR-ITU standards
- Details SDTV and HDTV equipment compatibility issues
- Suggests transition scenarios from SDTV to DTV

**MICHAEL ROBIN and MICHEL POULIN**

# Contents

Preface xiii

<b>Chapter 1. Basics of Television</b>	<b>1</b>
1.1 Historical Background	1
1.2 The Eye-Brain Mechanism	2
1.2.1 The Characteristics of Visible Light	2
1.2.2 The Light Perception	2
1.2.3 Visual Acuity	3
1.2.4 Persistence of Vision	4
1.2.5 Spectral Visibility	6
1.3 The Scanning Standards	6
1.3.1 The Scanning Process	7
1.3.2 Lines Per Frame	7
1.3.3 Pictures Per Second	9
1.3.4 The Conventional Scanning Standards	9
1.4 The Resolution Concept	9
1.4.1 Vertical Resolution	10
1.4.2 Horizontal Resolution	12
1.5 The Composite Video Signal	16
1.5.1 The Video Information	16
1.5.2 The Synchronizing Information	16
1.5.3 The Makeup of the Composite Video Signal	16
1.5.4 Interface Characteristics	17
1.5.5 Blanking Intervals and Structure	20
1.6 The Spectrum of the Video Signal	25
1.7 Transmission Standards and Constraints	28
1.7.1 Video Carrier Modulation	28
1.7.2 Audio Carrier Modulation	29
1.7.3 Channel Bandwidth and Structure	30
1.7.4 Transmission Constraints	32
<b>Chapter 2. Analog Video Fundamentals</b>	<b>37</b>
2.1 Color Television	37
2.1.1 Colorimetry	38
2.1.2 Transfer Characteristics	40
2.1.3 The Basic Ingredients	41

2.1.4	The Color Bar Signal	43
2.2	Composite Video	50
2.2.1	Common Characteristics	50
2.2.2	The NTSC System	52
2.2.3	The PAL System	62
2.2.4	The SECAM System	77
2.2.5	Performance-Indicative Parameters and Measurements Concepts	86
2.2.6	The Distribution of Video Signals	106
2.2.7	The Recording of Video Signals	109
2.3	Component Video	112
2.3.1	The GBR Signals	113
2.3.2	The Y, B-Y, R-Y Signals	119
2.3.3	The Component Video Recording	126
<b>Chapter 3. Digital Video Fundamentals</b>		<b>131</b>
3.1	General Considerations	131
3.1.1	Historical Background	131
3.1.2	The Typical Black Box Digital Device	132
3.1.3	Sampling the Signal	133
3.1.4	Quantizing the Sampled Values	134
3.1.5	The Dynamic Range and the Headroom Concept	136
3.1.6	The Quantizing Error	137
3.1.7	The D/A Conversion	139
3.2	The Composite Digital Standards	140
3.2.1	The $4f_{sc}$ NTSC Standard	142
3.2.2	The $4f_{sc}$ PAL Standard	151
3.2.3	Performance-Indicative Parameters and Test Concepts	162
3.2.4	Bit-Parallel $4f_{sc}$ Digital Signal Distribution	168
3.3	The Component Digital Standards	169
3.3.1	The Sampling Rates	171
3.3.2	The Coded Signals	174
3.3.3	The Sampling Frequencies	174
3.3.4	The Quantizing Range and the Implications	179
3.3.5	The Sampling Structure	184
3.3.6	The Time-Division-Multiplexing of Data	185
3.3.7	Timing Reference Signal	190
3.3.8	Ancillary Data	198
3.3.9	Bit-Parallel 4:2:2 Digital Signal Distribution	200
3.3.10	Review of Other Component Digital Sampling Formats	201
3.3.11	Performance-Indicative Parameters and Test Concepts	206
<b>Chapter 4. Elements of Acoustics</b>		<b>213</b>
4.1	The Sound Pressure Level	213
4.2	Loudness and Loudness Level	214
4.3	The Dynamic Range of the Ear	216
4.4	The Spectral Resolution of the Ear	216
<b>Chapter 5. Analog Audio Fundamentals</b>		<b>217</b>
5.1	Electrical Signal Levels and Units of Measurement	217
5.1.1	The dBm	217
5.1.2	The dBu	218
5.1.3	The dBV	218
5.2	Typical Signal Levels and Impedances	

5.2.1	Microphone Signal Levels and Impedances	218
5.2.2	Line Signal Levels and Impedances	219
5.3	Signal Level Monitoring	222
5.3.1	The vu Meter	222
5.3.2	The PPM	222
5.4	Performance-Indicative Parameters and Measurement Concepts	223
5.4.1	Linear Distortions	223
5.4.2	Nonlinear Distortions	224
5.4.3	Noise	226
5.5	The Dynamic Range	228
5.5.1	The Overload Level and the Headroom Concept	228
5.5.2	The Minimum Acceptable Signal Level	229
5.5.3	Limits of Dynamic Range in a Studio Environment	229
5.5.4	Operational Approaches	231
5.5.5	Transmission Constraints	231
5.6	Performance Targets	232
 <b>Chapter 6. Digital Audio Fundamentals</b>		<b>235</b>
6.1	General Concepts of Digital Audio	235
6.1.1	Introduction	235
6.1.2	Digital Audio Concepts	235
6.2	Principles of A/D Conversion	236
6.2.1	Ideal Sampling	236
6.2.2	Nyquist Principle and Aliasing	237
6.2.3	Actual Sampling	239
6.2.4	Quantization	239
6.2.5	Coding	244
6.2.6	Dither	244
6.2.7	Dynamic Range	245
6.2.8	Standard Sampling Frequencies	247
6.2.9	Preemphasis	247
6.3	Principles of D/A Conversion	248
6.3.1	The D/A Converter	248
6.3.2	Aperture Effect	248
6.3.3	Low-Pass Filter	249
6.3.4	Oversampling	250
6.3.5	Noise Shaping	256
6.3.6	Practical Limitations of A/D and D/A Conversions	256
6.4	Description of Biphase Mark Encoded Signal	259
6.4.1	Channel Bandwidth	259
6.4.2	NRZ and Biphase Encoding	259
6.5	General Structure of the AES/EBU Interface Protocol	261
6.5.1	The Format Structure	262
6.5.2	AES/EBU Data Signal Characteristics	268
6.6	AES/EBU Signal Electrical Characteristics	268
6.7	Digital Audio Interface Implementation	268
6.7.1	Digital Audio Input Interface	268
6.7.2	AES/EBU Decoder and Demultiplex	269
6.8	Digital Audio Signal Distribution	270
6.8.1	110-ohm Twisted-Pair Cable Distribution	271
6.8.2	75-ohm Coaxial Cable Distribution	271
6.8.3	Wiring Practices and Interconnection	271
6.9	Other Interfacing Protocol Formats	272
6.9.1	MADI Format	272
6.9.2	SDIF2 Format	274

6.9.3	SPDIF Format	275
6.10	Audio Synchronization	275
6.10.1	Synchronization Between Digital Audio Signals	275
6.10.2	Synchronization Between Digital Audio and Video Signals	276
6.11	Digital Audio Recording	282
<b>Chapter 7. Bit-Serial Signal Distribution and Ancillary Data Multiplexing</b>		<b>283</b>
7.1	Shannon's Theorem	284
7.2	Channel Coding	286
7.3	The Eye Diagram	288
7.4	Bit-Serial Distribution Standard	291
7.4.1	Interface Characteristics	291
7.4.2	$4f_{SC}$ Bit-Serial Distribution	294
7.4.3	4:2:2 Bit-Serial Distribution	304
7.5	Performance Indicative Parameters and Measurements Concepts	308
7.5.1	Measuring Transmitter-Related Parameters	309
7.5.2	Measuring Transmission-Related Parameters	317
7.5.3	Measuring Receiver-Related Parameters	321
7.5.4	Special Test Signals	323
7.6	Digital Audio Multiplexing	330
7.6.1	Minimum Implementation	332
7.6.2	Full AES Implementation	332
7.6.3	The Audio Multiplexer	335
7.6.4	The Audio Demultiplexer	337
7.7	Digital Videotape Recording	337
7.7.1	$4f_{SC}$ Composite DVTRs	337
7.7.2	Component DVTRs	340
7.8	System Considerations	342
<b>Chapter 8. Digital Signal Compression and Distribution</b>		<b>345</b>
8.1	General Concepts of Video Bit-Rate Reduction (BRR)	345
8.1.1	Video Signal Redundancies and Entropy	346
8.1.2	HVS Characteristics	347
8.2	Video Data Reduction Techniques	351
8.2.1	Lossless Data Rate Reduction	351
8.2.2	Lossy Data Rate Reduction	353
8.3	DCT Coding Process and Implementation	354
8.3.1	DCT Coding Process	354
8.3.2	DCT Block Quantization Process	365
8.3.3	Zigzag Scanning	367
8.3.4	Run-Length and Level Coding	368
8.3.5	Variable-Length Coding	369
8.3.6	Buffer Memory	371
8.3.7	DCT Decoder	372
8.3.8	Temporal Data Reduction Techniques	376
8.3.9	Motion-Compensation Prediction Technique	376
8.3.10	Complementary Processing Techniques	383
8.4	Video Compression Standards	384
8.4.1	Video Data Structure Hierarchy	385
8.4.2	JPEG and Motion-JPEG Schemes	388
8.4.3	MPEG-1 Video Scheme	389
8.4.4	MPEG-2 Video Scheme	393
8.5	Video BRR Performance and Applications	395
8.5.1	Video BRR Scheme Characteristics	395

8.5.2	Data Rates and Compression Ratios	396
8.5.3	Video BRR Scheme Performance	398
8.5.4	Video BRR Scheme Applications	399
8.6	General Concepts of Audio BRR	401
8.6.1	Need for Audio BRR	401
8.6.2	Human Perceptual System Characteristics	401
8.7	Audio Data Reduction Techniques	403
8.7.1	Lossless Data Reduction	404
8.7.2	Lossy Data Reduction	405
8.7.3	Audio Coding Process and Implementation	406
8.8	Audio Compression Standards	410
8.8.1	MPEG-1 Audio Subsystem	410
8.8.2	MPEG-2 Audio Subsystem	414
8.8.3	Other Compression Schemes	416
8.9	Audio BRR Scheme Performance	419
8.10	Distribution of Compressed Signals	420
8.10.1	Packetized Elementary Stream	420
8.10.2	Program Stream	422
8.10.3	Transport Stream	422
 <b>Chapter 9. Computers and Television</b>		<b>427</b>
9.1	Computer Architecture	428
9.2	Internal Computer Data Communication Buses	428
9.2.1	Main System Buses	428
9.2.2	Local Buses	432
9.2.3	Over-the-Top Buses	435
9.2.4	Switched Buses	437
9.2.5	Data Bus Router	439
9.3	Display Monitors for Computers	440
9.3.1	The CRT Construction	441
9.3.2	General Considerations	441
9.3.3	Display Monitor Performance Characteristics	444
9.3.4	Computer Monitor Formats	446
9.4	Expansion Cards	448
9.4.1	Video Controller Cards	448
9.4.2	Video/Audio Interface Cards	452
9.4.3	PCMCIA Expansion Cards	453
 <b>Chapter 10. Multimedia and Television</b>		<b>455</b>
10.1	The Multimedia Concept	455
10.2	Multimedia Technologies	456
10.3	Multimedia Hardware and Systems	458
10.3.1	PC Workstations	459
10.3.2	Audio and Video Signal-Processing Systems	459
10.3.3	Disk and Tape Storage	460
10.3.4	Servers	464
10.3.5	Cameras	466
10.3.6	Videocassette Records (VCRs)	466
10.3.7	CD-ROM and Magneto-optical Disks	467
10.3.8	Digital Video Interactive (DVI)	468
10.4	Multimedia Interconnections	468
10.4.1	Interfaces	469
10.4.2	Networks	477
	Multimedia Software	482

10.6	Multimedia Systems and Applications	483
10.6.1	Video on Demand (VOD)	484
10.6.2	Near Video on Demand (NVOD)	485
10.6.3	PhotoCD	485
10.6.4	Compact Disk Interactive (CD-I)	485
10.6.5	Computer-Telephony Integration (CTI)	486
10.7	Multimedia Standardization Activities	486
 <b>Chapter 11. Advanced Television (ATV) Concepts</b>		<b>489</b>
11.1	Why the Industry Is Moving to DTV	489
11.2	Standardization Efforts Toward a Single Standard	491
11.3	The ATV Emergence	494
11.4	The Digital Solution	496
11.4.1	Interoperability	496
11.4.2	Flexibility	498
11.4.3	Compression	499
11.4.4	Progressive Versus Interlaced Scanning	500
11.4.5	Image Aspect Ratio and Pixel Aspect Ratio	500
11.4.6	Production Aperture and Clean Aperture	501
11.4.7	Audio System Considerations	502
11.4.8	DTV Compatibility with Film Originating Programs	503
11.5	DTV Picture Formats	505
11.5.1	The HDTV Formats	506
11.5.2	The Standard Definition 720x483P Format	545
11.6	Serial Transport Interfaces in the Studio	557
11.6.1	General	557
11.6.2	The 1.485-Gbps HDTV Bit-Serial Distribution Interface	559
11.7	Data Multiplexing	569
11.7.1	HANC Multiplexing	569
11.7.2	VANC Multiplexing	579
11.8	The Grand Alliance System	579
11.8.1	System Overview	581
11.8.2	Video System Characteristics	582
11.8.3	Audio System Characteristics	585
11.8.4	Ancillary Data Services	587
11.8.5	Program Multiplex and Transport System Characteristics	588
11.8.6	RF/Transmission System Characteristics	589
11.8.7	Receiver Characteristics	590
11.9	The European Digital Video Broadcasting (DVB) System	593
 <b>Chapter 12. Transition to DTV</b>		<b>597</b>
12.1	Interfaces, Networks, and Transmission Protocols	597
12.1.1	Reference Architecture	598
12.1.2	Reference Architecture Components	599
12.1.3	Networks	600
12.1.4	Transmission Protocols	602
12.2	Data Streaming and Data File Transfers	604
12.2.1	Streaming Transfers	604
12.2.2	File Transfers	605
12.2.3	Transmission Control Protocols	605
12.3	Transport Technologies for Intrafacility Applications	605
12.3.1	Serial Data Transport Interface	606
12.3.2	Fiber Channel Networking	606
