The image shows a search interface with two tabs: "ADVANCED SEARCH" (active) and "CITATION SEARCH". The "Advanced search" section has a "Context Search" dropdown menu open, showing options: "Anywhere", "Title", "Author", "Keywords", "Abstract", "Author Affiliation", and "Funding Agency". A red arrow points to the "Anywhere" option. Below the dropdown are three search term input fields, each with an "X" icon to the right. A fourth field with a "+" icon is partially visible. Below these is a field for "Enter a journal, book, or reference work title". The "PUBLICATION DATE" section has radio buttons for "All Dates", "Last", and "Custom Range". The "All Dates" option is selected. The "Last" option has a "Month" dropdown. The "Custom Range" option has "Month" and "Year" dropdowns, followed by "to", and another "Month" and "Year" dropdown. A "Search" button is at the bottom right. To the right of the search form is a "Search Tips" section with text about Boolean operators and wildcards, and an "Author Search" section with text about author names.

**Search Tips**

You can use the Boolean operators AND (also + or &), OR and NOT (also -) within search fields. These operators must be entered in UPPERCASE to work.

If more than one term is entered, and no operators are specified, terms are searched using AND. To search for a phrase, put the terms in quotes. For example, *spinal cord* searches spinal AND cord while "spinal cord" finds this exact phrase.

**Wildcards**

Use a question mark (?) in a search term to represent a single character (*wom?n* finds women or woman). Use an asterisk (\*) to represent zero or more characters. For example, *plant\** finds all words with that root (plant, plants, & planting) while *an\*mia* finds variants with one or more letters (anemia & anaemia). Wildcards CANNOT be used at the start of a search term (\*tension) or when searching for phrases in quotes ("tobacco smok\*").

**Author Search**

Author names may appear with full first names or just initials. Place author names in quotes to find

En *Búsqueda avanzada* se puede buscar con mayor detalle y refinar los resultados de acuerdo a diversos criterios.
