

BIBLIOGRAFIA CURSO.

- ✓ “Quantum Dot Solar Cells” (Lecture Notes in Nanoscale Science and Technology), Jiang Wu y Zhiming M. Wang, (Editores), 2014, Springer.
 - ✓ “Nanostructured Materials for Solar Energy Conversion”, Tetsuo Soga, (Editor), 2007, Elsevier Science.
 - ✓ “Electrochemically grown ZnO nanorod arrays decorated with CdS quantum dots by using a spin-coating assisted successive-ionic-layer-adsorption and reaction method for solar cell applications”, Lucia Campo, Carlos J. Pereyra, Lucia Amy, Fernando Elhordoy, Ricardo E. Marotti, Francisco Martín, José Ramón Ramos-Barrado and Enrique A. Dalchiele, *ECS Journal of Solid State Science and Technology*, **2**, Q151-Q158, 2013.
 - ✓ “Optical properties of CdS and CdTe sensitized ZnO nanorods”, Pereyra, C.J., Ferrer, F., Marotti, R.E., Gómez, C., Campo, L., Amy, L.I., Martín, F., Leinen, D., Ramos-Barrado, J.R., Dalchiele, E.A., *Materials Research Society Symposium Proceedings*, 1707, 2014.
 - ✓ “ZnO nanorods/CdS nanocrystals core/shell –type heterostructures for solar cell applications”, Gariné Guerguerian, Fernando Elhordoy, Carlos J. Pereyra, Ricardo E. Marotti, Francisco Martín, Dietmar Leinen, José R. Ramos-Barrado and Enrique A. Dalchiele, *Nanotechnology*, **22**, 505401-505409, 2011.
