

Ejercicio 1

$$T_u = 314,7 \text{ kN}$$
$$\varepsilon_{s1} = 10\text{‰} \quad ; \quad \varepsilon_{s2} = 1,17\text{‰}$$

Ejercicio 2

- a) ELU,
 $A_{s1} = 7,16 \text{ cm}^2$ (4 ϕ 16)
 $A_{s2} = 5,72 \text{ cm}^2$ (3 ϕ 16)
- b) ELS, tomando $\sigma_s = 200 \text{ MPa}$,
 $A_{s1} = 10,36 \text{ cm}^2$ (4 ϕ 20)
 $A_{s2} = 8,29 \text{ cm}^2$ (3 ϕ 20)

Ejercicio 3

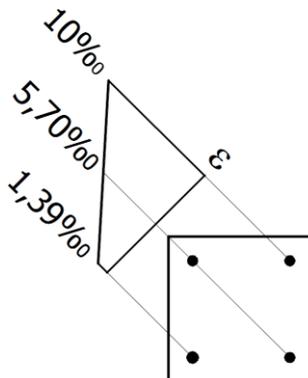

$$T_u = 293,6 \text{ kN}$$
$$\varepsilon_{s1} = 0,90\text{‰} \quad ; \quad \varepsilon_{s2} = 10\text{‰}$$

Ejercicio 4

$$A_{s1}/A_{s2} = 1,19$$

Ejercicio 5

$$T_u = 546,4 \text{ kN}$$

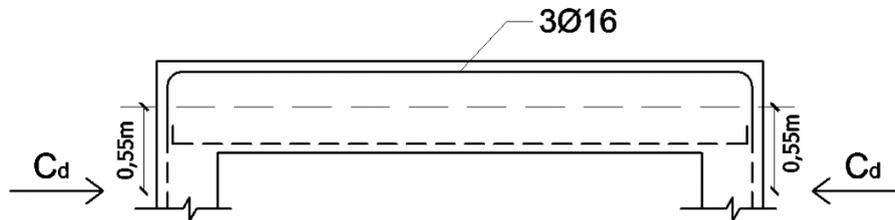

Ejercicio 6

$$A_{s1} = 8,60 \text{ cm}^2$$
 (3 ϕ 20)

Ejercicio 7

$$A_{s1} = 6,01 \text{ cm}^2 (3\phi 16)$$

Ejercicio 8

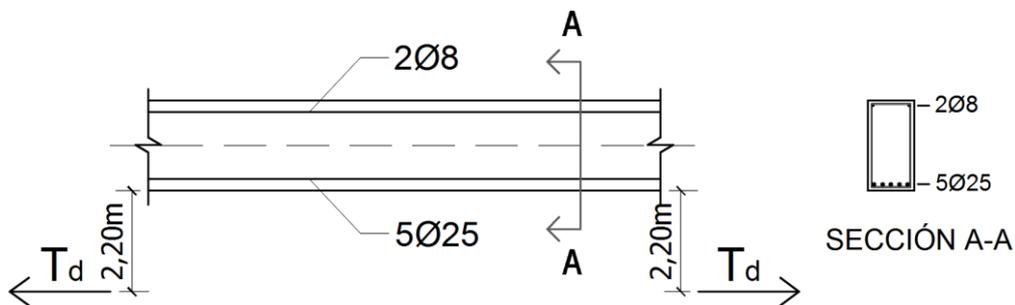

$$A_{s1} = 8,21 \text{ cm}^2 (3\phi 20)$$

$$A_{s2} = 2,48 \text{ cm}^2 (3\phi 12)$$

Ejercicio 9

$$A_{s1} = 23,81 \text{ cm}^2 (5\phi 25)$$

$$A_{s2} = 0,81 \text{ cm}^2 (2\phi 8)$$

Ejercicio 10

$$\left. \begin{array}{l} M_{d,y}^+ = 13,27 \text{ kNm/m} \\ T_{y,d} = 18,0 \text{ kN/m} \end{array} \right\} \rightarrow A_{s,nec} = 5,06 \text{ cm}^2/\text{m} \rightarrow \phi 10/15$$

$$\left. \begin{array}{l} M_{d,x}^+ = 5,71 \text{ kNm/m} \\ T_{x,d} = 13,5 \text{ kN/m} \end{array} \right\} \rightarrow A_{s,nec} = 2,56 \text{ cm}^2/\text{m} \rightarrow \phi 8/19$$
